EXHIBITOR PROFILE

✓ FLAT GLASS

- Glass production technology.
- Glass processing and finishing.
- Glass fabrication
- Glass machinery
- Facades elements.
- Glass products and applications.
- Auxiliary products, fittings and tools.
- Hardware.
- Finished glass products
- Architecture glass
- Automotive glass products and fabrication
- Appliances glass products and fabrication
- Refractory material
- Software.
- Associations.
- Trade publications.
- Schools, industry associations, specialized publications and press media.
- And more.

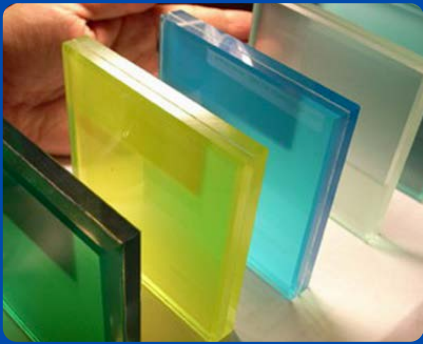

EXHIBITOR PROFILE

CONTAINER GLASS

- Finished container glass products
- Melting equipment.
- Forming equipment.
- Raw materials.
- Refractory materials
- Annealing equipment.
- Inspection / quality control.
- Batching equipment.
- Decoration equipment /materials.
- Cold end equipment.
- Processing equipment.
- Glass packing products and fabrication
- Software.
- Associations.
- Trade publications.
- Schools, industry associations, specialized publications and press media.
- And more.

Why Kenya?

Key Advantages:

- Gateway to East African Community (EAC) markets
- Regional access to Uganda, Tanzania, Rwanda, Burundi, South Sudan, Ethiopia
- Strong import-driven building materials market
- Well-developed logistics and port infrastructure

Flat Glass Market insight

Kenya and many African economies are experiencing:

- Rapid urbanization
- Growing middle-class housing demand
- Large-scale infrastructure and commercial construction
- Expansion of real estate and industrial facilities

Container Glass Market insight

Kenya has a relevant container glass maker, who can produce 120 tons a day with advanced IS machines, specializing in high-quality Flint glass.

Leader in the circular economy, recycling over 18,000 tons of glass annually

There is growing interest from investors to establish local container glass production lines, driven by domestic and regional demand.
